

CAUTION SIGNAGE

Wet slippery floors are dangerous. It does not matter how the floor got wet: rain, spillages or during mopping, you will still be liable for slips and falls caused by a slippery floor.

Hence a proactive display of caution signages is a high priority for all business owners. It is inexpensive and helps alert people to the danger of wet floors.

SuperSteam has an extensive range of caution signages suitable for both indoor, outdoor, foldable or solid and even door mounted options!

Caution Signboard Logo

- ✓ Various accessories are available to draw extra attention from the public and to add stability

TIPS

Good practices in using caution signage

It is advisable to put more than 1 signboard. For example, when mopping, it is important to put a signboard each at the start and the end of the mopping area.

Also, put at least 4 caution cones with a plastic chain to cordon off the ground area when cleaning from heights.

Caution signage is very affordable and absolutely essential in today's regulatory environment.

Front Back

Penguin Caution Board

4192-910001
