

HIGH-LEVEL CLEANING

SPACEVAC

CLEANING SUPPLIES

SpaceVac

WORLD'S LEADING HIGH-LEVEL CLEANING SYSTEM

Featuring a reach of up to 15m, the SpaceVac is designed for High-Level cleaning. With no need for ladders, scaffolding or hydraulic platforms, save time by covering up to 3 times the area when cleaning from the floor than from a lift.

Attached with a wireless camera system, it provides real time streaming while cleaning, while footage is downloaded to a SD card. For safety, every pole and head tool has a unique safety locking mechanism that ensures non-separation during use.

Scan Here For More Details

WIRELESS CAMERA & MONITORING

Streams via bluetooth to monitor real time

VERSATILE BRUSHES AND ACCESSORIES

Clean pipework, ducting, cable trays & walls

UNIQUE LOCKING MECHANISM

Ensures non-separation during use

CUSTOMISABLE SHAPES

Interlock at multiple angles to create custom configurations to reach into any space
